

FITRIA ROZI

AI Engineer | Deep Learning, Python & Model Evaluation

fitriaroz03@gmail.com | +62 823-8411-7474 | Batam, Indonesia (open to relocate to Jakarta) | GitHub: github.com/jifua | LinkedIn: linkedin.com/in/fitria-rozi

PROFESSIONAL SUMMARY

Fresh graduate with a Bachelor's degree in Physics (Electronics & Instrumentation) from Universitas Andalas (GPA 3.57/4.00), with hands-on experience building and evaluating deep learning models end-to-end using Python. Developed a CNN-based image classification model achieving measurable accuracy on a 10,000+ image dataset during a research internship at BRIN, and independently built and deployed an end-to-end AI-powered backend (FastAPI, REST API, Docker) live on Hugging Face Spaces. Proficient in Python, SQL, Git, and Docker, with a strong foundation in Machine Learning and Deep Learning fundamentals. Actively expanding into LLM, RAG, and AI Agent concepts through self-directed projects. Fast learner, detail-oriented, and comfortable reading and producing technical documentation in English.

RELEVANT EXPERIENCE & PROJECTS

Research Intern (MBKM) — Photonics Research Center, BRIN, Serpong

August 2024 – January 2025

- Built and trained a CNN-based deep learning model (TensorFlow) for image classification, managing a full data pipeline of 10,000+ images from collection to model training and evaluation.
- Evaluated model performance using accuracy, loss, confusion matrix, classification report, and ROC-AUC metrics, directly informing technical decisions on model improvement — demonstrating the model evaluation and iterative improvement capability this role requires.
- Collaborated with a multidisciplinary research team and delivered structured technical reports, strengthening the ability to communicate AI system results to non-technical stakeholders.

Independent AI Developer — OnionBot AI Platform

August 2025 – Present

- Designed and deployed an end-to-end AI-powered backend (Python/FastAPI) with REST API and database integration, owning the full development lifecycle from architecture to production deployment via Docker.
- Performed systematic root-cause analysis and monitoring on cross-platform issues, applying the troubleshooting and optimization mindset required for maintaining production AI systems.
- Live demo deployed and publicly accessible on Hugging Face Spaces, reflecting the ability to ship a working AI application independently.

Undergraduate Thesis — Embedded Deep Learning System (Raspberry Pi 5 & Hailo AI Kit)

2025

- Deployed a trained deep learning model for real-time image classification on an edge device (Raspberry Pi 5 + Hailo AI Kit), converting and optimizing the model (ONNX to HEF) for on-device inference.
- Integrated hardware and software components end-to-end (camera, sensor, display), demonstrating the ability to move an AI model from prototype to a functioning deployed system.

Job Application Toolkit — Independent Web App Project

2026

- Built a web-based toolkit featuring a CV matcher, job description analyzer, cover letter generator, interview practice, and application tracker — applying practical software engineering skills to a real-world AI-assisted product.

EDUCATION

B.Sc. in Physics (Electronics & Instrumentation) — Universitas Andalas, Padang

August 2021 – August 2025

GPA: 3.57 / 4.00

TECHNICAL SKILLS

- Programming: Python (strong — Pandas, NumPy, TensorFlow, FastAPI), SQL, basic Java
- AI/ML Fundamentals: CNN, deep learning model training & evaluation, transfer learning, fine-tuning basics
- Actively Learning: LLM concepts, RAG, AI Agent, prompt engineering, LangChain fundamentals
- Tools & Infrastructure: Git/GitHub, Docker, basic Linux, REST API design
- Deployment: Hugging Face Spaces, Vercel, Docker-based production deployment
- Soft Skills: strong analytical thinking, fast learner, comfortable with English technical documentation, effective cross-functional communication

CERTIFICATIONS

- Python for Data Science, AI & Development — IBM (2026)
- Data Manipulation with Pandas & Exploratory Data Analysis with Python — DQLab (2026)
- Data Analysis and Visualization with Power BI — Microsoft (2026)

PORTFOLIO & LIVE DEMOS

- GitHub (full project collection): github.com/jifua
- Live AI Demo — Onion Disease Classification: huggingface.co/spaces/jifua19/onion-disease-ai
- Job Application Toolkit (live web app): job-application-blond-beta.vercel.app
- Data Analyst Portfolio: portfolio-data-analyst-xi.vercel.app
- IT Support Portfolio: portofolio-it-support.vercel.app
